

Description: 6.50 Mil (140.4#) Polyester
Primer
3.00 Mil (52.0#) White Coextrusion

Features:

- > High performance thermal laminating film designed for use as a backing film for wide format graphics.
- > End uses include posters, trade show graphics, and POP displays where high opacity and rigidity are required. Can be used for back-lit applications.
- > Good opacity.
- > Increased bond strengths.
- > Useable temperature range of 170EF to 245EF.

Typical Properties	Test Method	Units	Typical Value
Gauge	ASTM D645	mils	10
Yield	Typical	in ² / lb.	2,240
Opacity	ASTM D1003	% Transmission	19
PET Side Coefficient of Friction	ASTM D 1894	Kinetic	0.40
Heat Seal Initiation Temperature	@ 40psi, 0.5 sec. dwell	°F	170

This information represents the typical values for this product. It is not intended to be used for specification limits, certification standards or other finite acceptance criteria. This laminating film is not intended for prolonged outdoor exposure. This product is manufactured without the use of CFC=s or VOC=s. Due to the wide variety of print media available, compatibility testing should be performed prior to use.
